Sprinting Inside Prince

There is a world of difference between digitally fronting existing systems, and rebuilding services as being fully digital still using legacy software. This is before we consider adding new features!

Building on ten years of experience, Advantage now delivers the full compliment of project delivery services and skills, to translate imperative necessity, and strategy into reality.

Alpine can take the whole journey with you from concept to deployment, or deliver components as sprints.

While broadly using SCRUM/Agile methods, we're pragmatic - if it doesn't work we adapt it.

**Advantage is more than an agency, we build-out our own open-source Cloud platforms,** we know what it takes to build hi spec compliant applications for large organisations:

**Faraday** – high security for mobiles and tables by combining geo fencing and beacons.

**Apperian** – high security AppStore for the public sector and corporates, with built in design validation, QA and Testing for consistent publication. Comes with document store for media distribution., works with all device brands.

### Supporting tools and services– always right for the customer!
